

Statement of Work — QuickBite Restaurants Loyalty Launch

1. Overview

LoyaltyCo will implement its loyalty points platform for QuickBite Restaurants, a fast-casual restaurant chain. The engagement covers platform setup, POS integration, offer configuration, and staff enablement.

2. Commercial Terms

QuickBite will launch with a set of promotional offers to be finalized with the Account Manager during onboarding.

Customers earn points on every purchase; the earn rate will follow the standard LoyaltyCo scheme unless otherwise agreed in the pricing annex.

A signed contract is a precondition for integration work.

3. Technical Scope

Integrate the LoyaltyCo platform with QuickBite's POS system via API.

Points must accrue in near real time and be redeemable in-store.

The integration must be tested end to end before launch.

4. Operations Scope

Operations will onboard the merchant, configure participating locations and offers, and train restaurant staff before launch.

On-ground training is required for all participating locations.

5. Timeline

Go-live is targeted for 15 February 2027.

Intermediate milestone dates will be agreed during project kickoff.

6. Service Levels

Platform availability and support response times will follow industry-standard service levels as documented in the master service agreement.
